USING SQLITE DATABASE

- 1) Introduction
- 2) Using SQLiteOpenHelper
- 3) Datatypes
- 4) Methods for managing SQLite database

ANIMATIONS & SERVICES

- 1) Introduction
- 2) Creating & Managing the Bound Services
- 3) Communicating with Remote Service

BUILDING & TESTING

- 1) Introduction
- 2) Implementing & Releasing Builds
- 3) Testing Builds
- 4) Android Testing Tools

PUBLISHING TO GOOGLE PLAY STORE

- 1) Introduction
- 2) Services
- 3) Publishing to Play Store
- 4) Managing the applications

The Theoretical and Practical sessions will be conducted simultaneously. The participants will be trained thoroughly to work on widgets, spinners, views, audios, videos, SQLite database and finally publish their own app on the Google Play store.

Assignment and Project:

1. Assignments will be of the following type:
 - MCQ based questionnaire.
 - Programming Assignments.
2. At the end of the course “Project” will be assigned to the participants which would be an application development along with demonstration of the tools usage.

Following are the details of the Project modules based on Real World scenarios:

A) Ecommerce - modules

- Login
- Display of Categories and Products
- Add to cart and Checkout

B) Food Order System – modules

- Login
- Display of different menus
- Placing order using Google maps.

Electronics & ICT Academy

(Under Ministry of Electronics and Information Technology (MeitY), Government of India)
